

Bloombase Spitfire SOA Security Server

Features

Rich XML and SOA Capabilities

XML proxy and firewall, XML parsing and filtering, secures EDI, EAI, SOA and Web Services (WS) data, schema validation, transforms and message routing

XML and WS Security

Rich and standard-based XML and WS security features including encryption, decryption, signature generation and verification

Hardware and Platform Independent

Spitfire SOA Security Server supports all hardware and operating system platforms.

High Availability

Highly scalable and multiple Spitfire SOA boxes running in cluster for failover in mission-critical systems and load-balancing for high-throughput EAI systems.

Applications

OASIS Security Assertion Markup Language (SAML)

Web Services Security (WSS)

Electronic Data Interchange (EDI) security

Enterprise Application Integration (EAI) security

Service Oriented Architecture (SOA) security

Visa 3-D Secure

Verified by Visa

MasterCard SecureCode

JCB International I/Secure

American Express SafeKey

Health Level Seven (HL7)

RosettaNet

Security

W3C compliant enveloping, enveloped and detached XML signature generation and verification
W3C compliant XML encryption and decryption
PKCS#1 signature generation and verification
PKCS#5 password-based encryption and decryption
PKCS#7 signature generation and verification
S/MIME encryption/decryption and signature generation
PKCS#5 encryption/decryption
Adobe Portable Document Format (PDF) signature generation and verification, encryption and decryption
NIST FIPS-197 AES encryption and decryption
Japan NTT/Mitsubishi Electric Camellia encryption and decryption
Korean SEED and ARIA encryption and decryption
Chinese National SCB2(SM1), SSF33, SSF28 encryption and decryption
NIST FIPS-46-3 3DES encryption and decryption
DES, RC4, RC2, CAST5 encryption and decryption
512, 1024 and 2048 bit public key cryptography
RSA and DSA public key cryptography
SHA-1, MD5 and Chinese National SCH(SM3) hash generation

Key Management

Multiple certificate authority (CA) support
Hardware true random (optional) or software pseudo-random key generation, inquiry and deletion
Built-in certificate request and revocation check (CRL/OCSP)
X.509 and PKCS#12 DER and PEM key import and export
Key Usage Profiling
RDBMS and Generic LDAP Support and Integration
Industry Standard PKCS#11
NIST FIPS-140-1 level 2 cryptographic module support (optional)
Automatic Certificate Retrieval via HTTP or LDAP
Certificate Validity Check
Certificate Revocation Check via HTTP or LDAP
Certificate Revocation List (CRL)
Certificate Revocation List Distribution Point (CRLDP)
Online Certificate Status Protocol (OCSP)
CRL scheduled download, caching and automatic retry
OCSP scheduled request, caching and automatic retry

XML Features

Encryption

Decryption

Enveloping, enveloped and detached XML signature generation and verification

Transforms

Canonicalization

Web Services

SOAP

XML-RPC

XSLT/XML processing

XML schema validation

XPath

Non-XML Features

PKCS#1 cryptography and digital signature

PKCS#7 cryptography and digital signature

Adobe PDF digital signature

Hardware Security Module Support

AEP Networks Keyper

Oracle Sun Crypto Accelerator

Sophos Utimaco SafeGuard CryptoServer

Thales nShield

HP Atalla

IBM 4758 Cryptographic CoProcessor

IBM eServer Cryptographic Accelerator

IBM Crypto Express2

IBM CP Assist for Cryptographic Function

Cavium NITROX XL

Other PKCS#11 compliant hardware security modules

Hardware Cryptographic Acceleration Support

UltraSPARC cryptographic accelerator

Intel AES-NI

Exar/Hifn Express DS cards

Accessibility

Web services
Plain socket
HTTP
Java HTTP tunneling
Java Remote Method Invocation (RMI)
Native language support: C, C++, Java

Portability, Scalability and Extensibility

Pluggable framework
Configurable business logic and workflow
User programmable

Standard Support and Certification

OASIS Key Management Interoperability Protocol (KMIP) support
NIST FIPS 140-2 compliant Bloombase Cryptographic Module

Management

Web based management console
Central administration and configuration
User security
Serial console
SNMP v1, v2c, v3
syslog, auto log rotation and auto archive
Heartbeat and keep alive

Disaster Recovery

Configurations backup and restore
FIPS-140 hardware security module recovery key or software recovery key vault for settings restoration
Customer-defined recovery quorum (e.g. 2 of 5)
FIPS-140 hardware security module operator key or operator pin for daily Spitfire KeyCastle operation
High-availability option for active-active or active-standby operation
Stateless active-standby failover

Platform Support

Bloombase SpitfireOS

Solaris

HP-UX

OpenVMS

IBM AIX

z/OS

AS400

Linux

Microsoft Windows

Mac OS X

Hardware Support

i386-base architecture

AMD 32 and 64 architecture

Intel Itanium-2 architecture

IBM Power6 architecture

PA-RISC architecture

UltraSPARC architecture

System Requirements

System free memory 512MB

Free storage space 512MB

Warranty and Maintenance

Software maintenance and support services are available.
